Storage & Converting

For quality reasons EnDURO should be stored originally packed.

Storage & converting conditions of 20±5°C and 50±10% rel. humidity are recommended.

We always recommend comprehensive testing of materials prior to regular conversion.

All information is based on current quality level. We reserve the right to change this as part of our continual product development.

The information given in this datasheet is provisional and temporary and is not binding as the product remains in development stages.
Values provided are relevant to previous productions and may not be representative of all future makings.
